TERMINATOR

STYLE 349

FABRIC:
130gsm 100% super soft breathable polyester
kool dri fabric

SIZE:
S-3XL+5XL

DESIGN NOTES:
130gsm super soft breathable fabric provide the lightness, softness and easy breathable feature for your sports performance. Terminator concept lifts the game to a new level in sports performance and fashion, the garment features the bee nest fabric under armhole and also large scale on the back to ensure extra breathability and comfort when you are sporting. The piping with contrast stitches adding the design details to the garment.

indenting

Our vision is to supply the very highest standard of apparel, nothing less.

We can make your next shirt or blouse, using any of our existing styles and fabrics, or you can furnish us with your specific requirements for that individual image.

Our Indenting or offshore manufacturing service, for either of our 4 brands gives you the flexibility to choose your own colours, fabrics and style details.

This can extend to decoration, labeling and packaging to ensure you receive a finished product of the highest quality and uniquely yours.

Minimums vary for the various fabric types used and delivery by sea is between 10 and 12 weeks.

Talk to your distributor for the vast range of options available with this off-shore service.

Many Australians have trusted our garments to live up to their expectations and the customised offshore manufacturing of your chosen garment is no different.

Urban Nature, FrenchKuff, Australian Spirit and Aussie Kings garments are made in China and production space of our apparel is shared with many high quality recognised global brands that you see in the higher end retail stores.

These production houses are internationally certified to ensure that the procedures and standards are second to none.

We have room for creativity and individualisation, so why not design your own colour combination based on our existing fabrics and colours through our custom Indent Express Program. Please contact your distributor for further details.

STOCK SERVICE

INDENT EXPRESS (6-8 WEEKS)

size

CHARTS

Australian Spirit designers have also taken sizing into account. The Australian frame has changed over the last decade with more and more people becoming conscious of their health and fitness. Garment sizes have been described as either Generous or Slim Fitting. Our size charts represent this sizing and the following information will help you establish

what size you should buy in your Australian Spirit garment. Despite all of the measurements, the good old tried and true method is to grab your favourite fitting shirt, lay it down on flat surface and measure from arm to arm across the chest and compare the measurement to the size in this catalogue. Here are some guides for you...

HOW TO MEASURE

MEASUREMENT BODY POSITIONS

care

LAUNDRY

By observing the wash and care instructions in your Australian Spirit garment, you will be prolonging the life of your garment. Differing fabrics behave in different ways, so ensure you follow the CARE by strictly adhering to the laundering care guide either sewn in the side seam or on the reverse of the neck label, the care that you give your garment will ensure a long presentable life. Cotton based garments will fade over time with laundering and water conditions and detergents may accelerate the process.

Specific requirements on your care labels are there for a purpose. By years of industry trials and tribulations, recommended garment care instructions have been formulated to ensure the garment you get

continues to display all of the features you expected within normal wear and tear conditions. Adverse treatment, to that recommended on your care instructions, may result in the garment changing unexpectedly. Consider how a cotton garment can shrink noticeably once heat is applied, such as a tumble dryer.

Ever had a print smudge when you've touched it with a hot iron? If your garment has been printed we recommend you iron on the reverse side of the garment. Many care instruction features include text or simple icons that advise you of what you should and shouldn't do with regard to the care of your garment.

hand MADE

Regardless of the brand, all garments are hand made or sewn by hand using machinery that physically requires a human touch. There are machines used to fuse collars, place pockets in exactly the same place each time or do button holing but the actual construction or putting together of the shirts is done by hand. Our factories use the most modern machinery to exacting global standards to ensure a perfect make and look each time. This is why we have a 'tolerance of +/- 1cm' shown on our size chart, it's because of the human content in the manufacturing and whilst we make to exacting standards, sometimes a shirt may have a slight size change. We're confident in bringing this range to you and we know that the attributes of the shirt and the brand you've chosen will continue to impress.

TIPS TO GET THE FIT RIGHT

FRENCHKUFF

FrenchKuff half chest measurements are taken from where the sleeve joins the body.

URBAN NATURE

Urban Nature's measurements are taken 2.5cm from sleeve join.

VARIATIONS +/- 1 CM - 1/2 CHEST MEASURE

FRENCHKUFF®
www.frenchkuff.com.au

1/ Chest measure your favourite fitting shirt on a flat surface, from seam to seam, on Urban Nature measure 2.5-3 cm down from the sleeve/body and on FrenchKuff across the chest from where the sleeves join the body.

2/ Neck: For casual shirts, find a collared shirt that fits your neck well. Lay the collar flat on a table and measure the "top" edge of the collar. For dress shirts, measure around the base of your neck, keeping one finger between your neck and the tape measurement or simply get your favourite fitting shirt, Lay the collar flat and measure from the middle of the collar button around to the far end of the button hole.

3/ Sleeve: if you need to measure the sleeve length, relax your arm at your side, elbow slightly bent. Measure from the tip of your shoulder to your wrist.

Styles and Sizes vary from brand to brand. Fit by measurement and not by previous shirt size. Don't forget to take the style of the garment into consideration. Some styles have different fits, such as slim or loose fit. Don't forget to take shrinkage into account. Typically a 100% cotton garment can shrink up to 5%. Urban Nature shirts are a mix of polyester so don't expect a full 5% shrinkage.
